

## BRING HOME YOUR SUN

Warnings were given. The science was made available. Experts chimed in with their advice. And you ignored them all, didn't you? Big mistake. Inevitably, life as you once knew it... changed.

To be fair though, you weren't the only errant one. We all made the same mistakes, and humanity paid a terrible price.

The situation is dire, and it needs fixing, but you're not alone. This is on all of us. A collective responsibility to prevent further damage, and heal together.

The first step begins with a choice. A small, but steadfast commitment to keep deadly, unseen aggressors away from our loved ones.

**So cheer up. Don't dwell in the past. Get ahead of the curve. After all, hindsight maybe twenty-twenty, but it's 2021... and foresight's your strongest ally.**

**Along with us, of course.**

by HORIZON

**LIFE TECHNOLOGIES, UNLIMITED**

## **Welcome to the Horizon family**

**Namaste.**

**Thank you for your interest in Pi Star UV-Clean Systems, a revolutionary brand of UVC products manufactured by Horizon Health Craft India Private Limited.**

**Over many years, our parent company Bhastrik Mechanical Labs Pvt. Ltd. has consistently exhibited world class expertise in supplying sophisticated engineering hardware to Fortune 500 companies such as Siemens, General Electric, ABB and many other leading institutions across the world.**

**Horizon is our earnest foray into the world of consumer engineering, and we bring with us an eye for precision, a perfectionist attitude and the drive to enrich our customer's lives.**

**Every Pi Star product is designed with care for your longevity, health and happiness.**

## The power of the **SUN**, in your home.

**For centuries, scientists have studied the sun's rays and their beneficial properties, giving birth to marvelous inventions and discoveries that have changed the course of human history.**

Perhaps the most critical of these rays, are the ULTRAVIOLET-C rays, capable of destroying deadly pathogens such as harmful bacteria, viruses, molds and spores. These pathogens cling to the surfaces of anything and everything in their path, wreaking havoc in our lives.

UV-C rays target and damage their DNA code directly, preventing them from reproducing and spreading further.

Channeling this power of the sun is of paramount importance in today's world, giving every individual a proven disinfection tool in the war against the novel coronavirus.

Pathogens can spread through air, water and physical contact.

Just about everything around you, from door handles, bags, paper, vegetables, fruits, currency, cell phones, and so on are prone to risk. They are inescapable, unless we utilize a proven technology to disinfect these surfaces at a source level.

**Pi Star UV-Clean Systems is that proven technology.**

## UV-C Cabinets - Research-backed\* preset timers for optimal usage and convenience.

**Our 25L & 35L UV-C cabinets are carefully designed to meet the day to day requirements of Indian households.**

The perfect choice for 360 degree intelligent disinfection of your food items and personal belongings.

Available in two convenient sizes, the cabinets also provide a host of features for speed, user friendliness and maximum effectiveness.

### FDA COMPLIANT

All products tested and certified for

**99.99%**

**effectiveness in killing germs**

## FEATURES & BENEFITS

### AUTOMATIC SAFETY LOCK

The unit cuts off automatically when the door is opened, for user safety.

### KEEPS FRUITS AND VEGGIES FRESH

Scientifically proven to improve shelf life of fruits and vegetables.

### SAVES PRECIOUS WATER

UV-C approach to disinfection saves a significant amount of water.

### ECO-FRIENDLY & HAZARD FREE

No more chemicals. Good for you and good for the environment.

**COMING SOON** Air, Water, Surface Systems and Enterprise Solutions

We encourage you to use Pi Star UV-C products liberally. The energy consumption is negligible while the health benefits are immeasurable.

Assuming 2 hours usage per day, the monthly electricity bill is only Rs. 7 approximately - a trivial amount compared to enormous medical bills in the unfortunate event of falling ill.

Additionally, as per our conservative estimates, a family of four could save up to 600 litres of water per month. This could add up to billions of litres saved across the world.
